Science and Technology for Tomorrow's Air and Space Force

Success Story

DR. DEE H. ANDREWS ELECTED A FELLOW IN TWO DIVISIONS OF THE APA

The American Psychological Association (APA) elected Dr. Dee H. Andrews, of the Human Effectiveness Directorate, as a Fellow. They based their selection on Dr. Andrews' career contributions to military training research and development, especially the directorate's work with Distributed Mission Training.

Accomplishment

The APA recently elected Dr. Andrews as a Fellow in their Military Psychology Division and Applied Experimental and Engineering Psychology Division. He currently serves as division technical advisor of the directorate's Warfighter Training Research Division.

The APA recognizes Dr. Andrews' career expertise, which spans over 25 years of instructional training research, training cost-benefit analyses, and research and development management. Under Dr. Andrews' expertise and direction, the directorate received many awards, recognizing its scientific quality and positive impact on the warfighter and excellence in the aviation and space disciplines.

Among his personal achievements is the British Silver Medal, from the Royal Aeronautical Society, awarded "in recognition of his considerable contribution to research in the field of warfighter training research and systems." Dr. Andrews has authored over 60 professional publications (books, book chapters, journal articles, and technical reports) and presented at numerous international conferences.

Background

Based in Washington DC, the APA is a scientific and professional organization in the United States representing psychology. With more than 155,000 members, the APA is the largest association of psychologists worldwide.

The Military Psychology Division encourages research and the application of psychological research to military problems. Members are psychologists who serve diverse functions in settings including research activities, management, teaching, consulting, work with congressional committees, and advising senior military commands.

The Applied Experimental and Engineering Psychology Division's psychologists are research scientists conducting field and laboratory research and experiments on human performance. Their role in the system design process is to ensure consideration of human psychological, physiological, and performance characteristics.
